The 2008 Higher Education Opportunity Act (Public Law 110-315), requires all institutions of higher education that provide residential housing facilities for students to develop an annual fire safety report. The contents of this report reflect the requirements outlined in HEOA, which are included in Illinois State University's (ISU) Campus Fire Safety program.

INTRODUCTION

The Higher Education Opportunity Act (HEOA) became public law 110-315 in August 2008 requiring all institutions of higher education that provide residential housing facilities for students to develop an annual fire safety report. Contents of this report reflect the requirements outlined in HEOA, which are included in Illinois State University’s (ISU) campus fire safety program. Elements of the campus fire safety program consist of: fire prevention policies and practices, fire safety educational and training initiatives, description of fire protection equipment in the residence halls, emergency evacuation procedures, fire safety statistics, and plans for future improvements to the residence hall campus fire safety program. The annual fire safety report summarizes the elements of the campus fire safety program, which is administered and maintained by Environmental Health and Safety.

This public disclosure is intended to inform current and prospective students and employees of the fire safety programs and policies in place at ISU, and the institution’s state of readiness to detect and respond appropriately to fire related emergencies. Hard copies of the report are available for public review by calling 309-438-5162 or by visiting Environmental Health and Safety located in Room 202 of the Nelson Smith Building at Illinois State University. Environmental Health and Safety is open Monday through Friday, from 8:00 AM to 4:30 PM excluding holidays.

PROGRAM OBJECTIVES

It is the policy of ISU to establish effective procedures and practices in the areas of fire prevention/ protection designed to minimize the potential for fires on the ISU campus. In addition, the importance of fire safety is continually promoted to students, faculty and staff in an effort to recognize hazardous conditions and take appropriate action before such conditions result in a fire emergency. This goal is accomplished by:

- Providing fire safety and emergency response training to Resident Assistants (RA) training in August and January of each year.
- Conducting periodic review and update of fire prevention policies
- Conducting regularly scheduled announced and unannounced fire drills in the residence halls to test response procedures and readiness of staff and occupants.
- Promoting fire safety awareness for employees and students by conducting regularly scheduled drills and refresher training on fire prevention and emergency evacuation procedures.
- Inspecting, testing, and maintaining fire protection systems in accordance with National Fire Protection Association (NFPA) standards and Occupational Safety and Health Administration (OSHA) standards.
- Performing plan reviews and code consultation related to current capital improvement and remodeling projects.
- Mitigate fire hazards utilizing the information provided from regularly scheduled fire safety inspections performed by the University’s property insurance loss control consultant, and fire protection consultants.
**FIRE POLICIES AND PROCEDURES FOR RESIDENCE HALLS**

Fire prevention policies and procedures have been developed and implemented in an effort to help accomplish the program objectives. Applicable NFPA and, OSHA regulations relating to, residence halls were referenced during the development of these policies. A summary of these policies is highlighted below:

**ARSON AND AGGRAVATED ARSON**

The penalties for committing arson (Arson (720 ILCS 5/20 -1) ) and/or aggravated arson (Aggravated Arson (720 ILCS 5/20 -1.1) ) are severe. The Student Code Enforcement and Review Board recommend suspension from the University for persons engaged in such activities. In addition, the University Police Department may pursue criminal charges which could lead to a term of 3-30 years imprisonment and a $1,000 fine.

University Housing Services is committed to preventing disruptive behavior such as this. The staff will work to identify any person(s) responsible for such a disruption should it occur. All students with information which can assist in this endeavor are encouraged to contact a residence hall staff member or the Illinois State University Police Department. If and when necessary, a reward may be offered to the person(s) with information that leads to the arrest and conviction of the responsible person. Information about a reward being offered will be posted in the residence halls.

**EMERGENCY EQUIPMENT**

Tampering with, damaging, or inhibiting the use of emergency equipment in any residence hall is expressly prohibited. Residents may not use emergency equipment for any purpose other than emergency use. This includes fire extinguishers, heat and smoke detectors, fire hoses or water lines, public address systems, fire doors, exit lights or panels, or any other emergency equipment.

Tampering policies include smoke detectors and sprinkler heads which are fire safety equipment, and residents are prohibited from:

- Disconnecting a detector,
- Tampering with the detector or its operation,
- Purposely causing an alarm to occur,
- Hanging objects from or otherwise obstructing the sprinkler heads and pipes.
- Blocking open fire-rated door assemblies is strictly prohibited. Fire-rated door assemblies are UL listed and are designed to self-close and latch shut to prevent the passage of fire and smoke. Examples of fire-rated doors include:
  - student room doors
  - stairwell doors
  - separation doors between sleeping and commons areas
  - laundry rooms
  - any corridor doors

Violations of this policy are considered serious and may result in severe consequences. Individuals violating this policy may be billed for any repair costs and/or face criminal charges.
FIRE ALARMS*

Residents and their guests must evacuate the building in accordance with the building’s fire evacuation plan any time a fire alarm sounds. Failure to abide by this directive will result in disciplinary sanctions. The penalties for setting off a false fire alarm are severe. The Student Code Enforcement and Review Board has decided that the recommended sanction for such action should be suspension from the University. University Housing Services reserves the right to immediately remove anyone found setting off false fire alarms from the residence halls. In addition, the University Police Department will pursue criminal charges which could lead to a one-year imprisonment and a $1,000 fine. University Housing Services is committed to preventing disruptive behavior such as this. The staff will work to identify any person(s) responsible for such a disruption should it occur. All students with information which can assist in this endeavor are encouraged to contact a residence hall staff member or the University Police Department. If and when necessary, a reward may be offered to the person(s) with information that leads to the arrest and conviction of the responsible person. Information about a reward being offered will be posted in the residence halls.

FIREWORKS*

The possession and/or use of fireworks is prohibited in residence halls. THE UNIVERSITY ASSUMES THAT POSSESSION OF FIREWORKS IMPLIES INTENT TO USE THEM. The use of fireworks is dangerous and constitutes a serious fire hazard. Consequently, the penalties for possession and/or use of fireworks may be severe. The University Police may seek criminal charges against individuals violating this policy which could lead to a $1000 fine.

Based on the recommendation from Association of Residence Halls, individuals violating this policy are subject to relocation to another residence hall, cancellation of their residence hall contract and/or suspension from the University. The Student Code Enforcement and Review Board determines student suspensions.

University Housing Services is committed to preventing disruptive behavior such as this. The staff will work to identify any person(s) responsible for such a disruption should it occur. All students with information which can assist in this endeavor are encouraged to contact a residence hall staff member or the University Police Department. If and when necessary, a reward may be offered to the person(s) with information that leads to the arrest and conviction of the responsible person. Information about a reward being offered will be posted in the residence halls.

*Note: Staff members are not eligible to receive rewards as it is the responsibility of all staff members to report information about incidents

Items Not Permitted in University Residence Halls

Items not permitted to be used or stored in student rooms or any other area of the residence halls include, but are not limited to: any internal combustion engine, any acids, automobile batteries, halogen lamps, gasoline, firearms or other weapons, fireworks, water beds or other water filled furniture, microwave ovens, and/or other heat producing appliances, i.e. coffee pots, hot pots, popcorn makers. Due to health standards and possible inconvenience to other residents, no animals (except for service animals approved by the Disability Concerns Office for residents with disabilities), birds, or pets of any kind other than fish are to be housed or kept in the residence halls. Weight lifting equipment and devices, musical instruments equipped with amplifying devices, and instruments which disturb other residents may be used only in those areas of the residence halls so designated. They may not be used in student rooms.
ROOM INSPECTION, ENTRY AND SEARCH

The University reserves a reasonable right of entry into a student’s room to assure proper maintenance and repair, to provide for the health and safety of all residents, and/or to investigate when there is a reason to believe that violation of a statute, residence hall policy or University regulation is occurring within that room. In cases where students are not present at the time of entry, staff will not search through personal belongings but will refer any policy violation that is in plain sight to the disciplinary process. Staff members do not inspect each room when the building is evacuated because of fire.

Hall staff will enter students’ rooms after closing the building for Thanksgiving, Semester Break, and Spring Break. The reason for checking each room is to ensure that room windows are secured in case of inclement weather, electrical outlets are unplugged in the event of a power surge, and that trash is emptied to avoid pest problems. Should a staff member notice additional policy violations, the students will be referred to Community Rights and Responsibilities (Dean of Students’ Office). A closing newsletter will be provided for each room to assist students with closing preparations. A member of the hall staff should be contacted if there are any questions.

APPLIANCES, COOKING, AND FOOD STORAGE

All electrical appliances in residence halls must be Underwriter Laboratory approved. All electrical heat-producing and cooking appliances, with the exception of hair appliances, are prohibited from possession and/or usage in the residence halls.

ELECTRICAL APPLIANCES

As a result of the increased use of cooking and heat producing appliances in the residence hall rooms and the resulting life safety and energy concerns, the University prohibits possession and/or usage of ALL ELECTRICAL APPLIANCES with the exception of hair apparatus, lighted mirrors and electric shavers. Irons may be utilized in a floor/ suite utility room or other designated areas; however, iron usage is prohibited in student rooms.

Refrigerators are also permitted in a student room, however; they may be no larger than 4.3 cubic feet and 1.5 running amps.

The "electrical appliance" policy also prohibits ALL energy-consuming lighted wall or window signs, ALL electrically-powered tools, and all halogen lamps. Items of questionable wattage should be addressed with the Residence Hall Coordinator. Power strips are permissible as long as they have a built-in circuit breaker.

Extension cords and power strips may not be "daisy chained" (two or more connected cords/ strips). Students violating this policy will be fined $50 for the first violation and $100 for any violation thereafter. A microwave oven is provided on each of the student living floors and every two suites in Watterson. These microwaves will be available to students 24 hours a day.

FURNISHINGS

The University supplies basic furniture, such as desk, chair, dresser, study lamp, closet, bed, window treatments, and mattress. Students supply their own sheets, pillow, pillow case, mattress pad, blanket, bedspread, towels, wastebasket (these should be metal) and other personal items. Students must not move furniture from room to room, stack furniture, move furniture from public areas to their rooms, or detach fixed furniture. Halogen lamps are prohibited in the residence halls.
SMOKING POLICY

Smoking is prohibited in all facilities at Illinois State University. This includes:

- all buildings/facilities, including inside sports stadiums, gymnasiums, pavilions, or other similar places where the general public may assemble;
- inside all University vehicles;
- any area within a distance of 15 feet from entrances, exits, windows that open, and ventilation intakes that serve any campus building.

Smoking receptacles have been strategically placed throughout campus and those who smoke are requested to use them so that a clean and visually attractive campus is maintained. Signs have been posted to assist in communication of the campus’ revised smoking policy.

DECORATIONS IN PUBLIC AREAS

Any and all decorations used in public areas must be made of fire-resistant materials. No public area decoration may hinder the use of, or restrict access to, hallways, doorways, stairs, corridors, or fire related equipment. Do not attach anything to or tamper with light fixtures or exit signs. Holiday trees must be ARTIFICIAL to be approved for residence hall use. The use of electric decorative holiday lights is restricted to "miniature Italian lights" that are either "U.L." (Underwriter's Laboratory) or "F.M." (Factory Mutual) approved. Decorations violating this policy may be removed by residence hall staff. Contact a residence hall staff person for clarification.

DECORATIONS IN STUDENT ROOMS

Residents may not add attachments of any type to a residence hall light fixture, including paint, tissue paper, crepe paper, tinfoil or any other material. NO materials, whether flammable or non-flammable, may be suspended from, attached to, or draped beneath the ceiling. Any materials such as tinfoil, paper, cloth, paperboard, plastic, etc. used to cover the walls in student rooms must be limited to less than half of the total room wall space. Decorations with open flames (whether lit or unlit) such as candles, wick lamps, incense, etc. are prohibited in student rooms. Residents may not add any permanent fixtures, constructions or wallpaper to their rooms. This includes the use of borders and contact paper. The use of these cause damage to painted walls and will require repainting at the resident’s expense. Only University curtains or draperies may be used in students' rooms.

ROOM B EDS

Bunk beds may be constructed in the residence hall rooms providing the structure is FREE STANDING. A bunk bed may not be constructed so that it needs to rest on any other piece of furniture, heating unit or wall for structural support, nor may it be constructed with the use of pressure pins that may in any way attach the bunk bed to the ceilings and/or walls. Bunk beds not meeting the free-standing guidelines must be immediately corrected or disassembled by the residents of said room. Constructions that divide student rooms into more than one level (i.e., decks, platforms, etc.) will be limited in size to no more than 25 percent of the habitable floor space in any student room, due to such materials add substantially to the potential fire load and potentially inhibiting escape and/or rescue in the event of a fire. Similarly, other room constructions such as lofts, decks, walls, etc., may also be limited in the event they are deemed potential fire safety hazards.
**Residence Hall Room Doors**

Due to fire safety considerations and the significant amount of damage done to residence hall room doors, postings on the inside of residence hall room doors are limited to signs, posters, etc., which cover NO MORE THAN 50 PERCENT OF THE DOOR. Emergency evacuation information must remain visible.

Additionally, residents may not post, hang, or otherwise attach any material to the outside of their room door. The only exception to this is residents will be allowed to post one memo board (those comprised of pressed fiber board), not to exceed 11” x 14” per room on the outside of their door.

Residents seeking temporary exemptions to this policy (birthday, anniversary, special occasion, etc.) may request temporary exemption from their Residence Hall Coordinator stating the reason for the request and the duration of time for which the exemption is sought.

**Fire Policies and Procedures for Apartment Complexes**

Fire prevention policies and procedures have been developed and implemented in an effort to help accomplish the program objectives. Applicable NFPA and OSHA regulations relating to apartments were referenced during the development of these policies. A summary of these policies is highlighted below:

**Entry Policy**

The University may enter the premises for the purpose of determining general cleanliness, to treat for pest extermination, to make repairs, to decorate or remodel, and to enforce general University rules and regulations.

**Firearms, Explosives, and Flammable Material**

A resident or guests of a resident shall not possess or use firearms, explosive devices, or any other devices classified as a weapon by the State of Illinois.

Storage and/or use of flammable material in the Illinois State University Apartment Living Complex is prohibited.

**Waterbeds**

Waterbeds are not allowed in the any complex.

**Decoration Policy**

No outside decorations will be permitted.

Natural decorations such as cornstalks, hay, straw, etc., shall not be used in University-owned apartments.

Natural Christmas trees are permitted, provided they are purchased fresh, placed in water-containing holders, and placed away from radiators, televisions, and other sources of heat.

Only miniature energy efficient lights, UL (Underwriters Laboratory) or FM (Factory Mutual) approved, shall be used in any decorations.

All lighted decorations shall be unplugged when leaving for overnight or longer periods of time.
No candles or open flame devices shall be used in any decorations.

Power cords cannot run between the door and door frame, where they may be pinched or cause other hazards; run the cord under the door. Do not run power cords under rugs or carpeting.

No decorations may be placed so as to obstruct the exiting path for the apartment or for other apartments.

University Housing Services and the Illinois State University Office of Environmental Health and Safety shall have the final authority as to what material may be used in decorations, should questions arise.

Decorations in violation of University policy must be removed immediately, at the direction of the Environmental Health and Safety Office or University Housing Services.

GUIDELINES FOR OUTDOOR GRILLS

Grills may not be operated inside any University apartment.

Grills must be at least six feet from the building when in use or hot.

Charcoal lighter fluid may not be stored outside any University apartment.

Gasoline may not be used to light charcoal fires.

Charcoal grill coals must be cold before disposal and must be dumped into a suitable garbage disposal container.

Charcoal grill coals, whether hot or cold, may not be dumped onto the ground.

The owner of the grill is responsible for the grill’s operation whenever it is in use or hot.

Small grills may be stored outside a resident’s door; large grills must be stored at the end of the building.

SMOKE-FREE BUILDINGS

Whenever residents or visiting guests wish to smoke, they will be required to refrain from smoking while inside the apartment or within 25 feet of the building.

Any person wishing to smoke will be required to do so outside of an apartment and 25 feet away from the building.

University Housing Services may charge violators of this policy with costs associated with cleaning and re-painting apartments to eliminate smoke odor.

BULLETIN BOARDS/POSTING POLICY

Bulletin boards are only for residents’ use.

All items must be approved by the ARHC.

All material is dated and initialed by a UHS staff person before it is placed on the board.
Materials are removed two weeks after posting unless the resident requests an extension. In case of an extension, all material is re-dated by the ARHC or Community Aide.

Residents cannot operate a business from their apartments; therefore no advertisement of any such business can be posted on the boards.

No materials promoting or displaying any alcohol or alcohol manufacturer or substance abuse product may be posted any time.

Nothing, including banners and signs, may be attached to the exterior of Complex buildings

**FIRE PROCEDURES**

If the smoke detector activates in your apartment:

- Check the apartment for smoke or actual fire. Should no smoke or fire be present, call (309) 438-9267.
- If there is an actual fire, or if smoke is present, evacuate all apartment occupants to the outside areas and out of the Fire Department’s way (across the street or drive).
- In case of an actual fire, warn the neighboring apartments that are along your path of evacuation.
- From the nearest available phone, dial 911. State your name, apartment complex, apartment number, and that the smoke detector is sounding in your apartment.
- Contact staff at 309-438-9267.
- Be available to the Normal Fire Department to direct them to your apartment or answer any questions.
- Do NOT attempt to extinguish the fire.
- All occupants should remain outside the building until the Normal Fire Department determines it is safe to re-enter the apartment building.

If you hear a smoke detector alarm coming from another apartment:

- Should the smoke detector sound in a vacant (unoccupied) apartment, dial 911. State your name, apartment complex, and apartment number where the smoke detector is sounding.
- If the smoke detector is sounding in an occupied apartment, check the apartment by banging on the door or walls, by yelling, etc. to determine if the occupants are home or have evacuated the apartment. Then find the closest phone and dial 911. State your name, apartment complex and the apartment number, and where the fire alarm is sounding.
- Evacuate the building, warning the neighboring apartments that are along your path of evacuation. Move a safe distance away (across the street or drive), so you will not be in the way of the Fire Department.
- Contact staff at 309-438-9267.
- Be available to the Normal Fire Department to direct them to the affected apartment and/or answer any questions.
- All occupants should remain outside the building until the Normal Fire Department determines it is safe to re-enter the apartment building.

**DRY POWDER FIRE EXTINGUISHER**

To operate the dry powder fire extinguisher:

- Remove the fire extinguisher from the holding bracket.
• Pull the safety release pin near the top of the fire extinguisher.
• Aim the nozzle of the fire extinguisher at the base of the flames.
• Squeeze the handles together to discharge the dry powder.
• Sweep slowly back and forth across the fire with the dry powder stream.

To check the dry powder fire extinguisher:

• Examine the circular pressure gauge located near the top of the fire extinguisher.
• If the indicator needle on this pressure gauge is in the center position or slightly to the overcharged position, the fire extinguisher should operate correctly.
• If the indicator needle on this pressure gauge is into the recharge position, the fire extinguisher may not function correctly.
• Contact University Housing Services Facilities, 438-8661, if the fire extinguisher pressure gauge indicator needle is into the recharge position or if the needle is well into the overcharge position.

SMOKE DETECTORS

To test the detector:

• CHECK THE RED LIGHT - Check the red light which can be seen by looking directly into the clear round button on the face of the detector. The red light should be always on.
• PUSH THE TEST BUTTON - Push the clear round test button on the face of the detector and hold it for about 10 seconds. If the detector is working correctly, the horn should sound; it should stop shortly after you release the button.
• CONTACT UNIVERSITY HOUSING SERVICES - Contact University Housing Services if the detector is not functioning properly.

UNIVERSITY REGULATIONS AND GOVERNMENTAL STATUTES

Failure to observe University regulations, Federal, State, or local laws subjects the violator to University disciplinary action and/or prosecution in the civil courts and/or cancellation of the Residence Hall Contract.

Inspection, Testing, and Maintenance of Fire Protection Equipment

Environmental Health and Safety (EHS) administers this element of the campus fire safety program with support from Facilities Management, Office of Energy Management, University Housing Services, Campus Dining Services, and outside fire protection contractors. The overall goal is to insure all fire protection equipment in the residence halls is tested, inspected, and maintained in accordance with applicable NFPA standards.

FIRE SAFETY EDUCATION AND TRAINING INITIATIVES

Residence hall staff including; Professional Staff, Resident Assistants, and Front Desk Staff receive fire safety training prior to the start of every fall and spring semester. Topics include a review of the fire prevention policies, weather safety, use of fire extinguishers, and an emergency evacuation exercise.

Emergency evacuation maps are installed on the inside of each resident’s room door to direct occupants to primary and secondary exits. Two fire drills per residence hall are conducted each fall and spring semester in coordination with Environmental Health and Safety, University Housing Services, Disabilities Concerns Office, and the Town of Normal Fire Department. Participation in fire drills is mandatory and failure to evacuate the building
during a fire alarm will result in disciplinary action. Environmental Health and Safety and Housing Services critique
the drills to identify problem areas, which are then discussed and resolved with affected staff.

Fire safety training programs are also provided at no cost to other student, staff, and faculty groups on campus by
request. This program typically consists of a brief review of fire prevention policies and procedures followed by
hands-on fire extinguisher training.

**FIRE PROCEDURES**

If students see fire or smoke in or near their room, they are to immediately call 911. When the emergency
dispatcher answers the phone, students will be requested to provide their name, the name of their building, the
floor number or area of the building, and what the student has or is observing. If the fire is in a student’s room,
he/she is to leave the room immediately and close the door. The nearest fire alarm station is to be pulled at the
first opportunity and other occupants of the floor or suite are to be alerted while exiting. Residents and their
guests must evacuate the building in accordance with the building’s fire evacuation plan ANY TIME a fire alarm
sounds. Evidence of non-reported fires should be communicated to the University Police Department at
(309)438-8631. These reports will also be included on the fire log for inclusion into the Annual Fire Safety Report.

ELEVATORS ARE NOT TO BE USED DURING A FIRE. If a student is in his/her room and the fire alarm sounds for
 evacuation, he/she should first check the door. If the door is warm or hot to the touch IT SHOULD NOT BE OPENED.
If the hallway is filled with smoke and/or flames, students are to stay in their room with the door closed. Spaces
around the door are to be sealed with towels or sheets to keep smoke from entering your room. If smoke does
enter the room, a window should be opened slightly. A towel, sheet or something noticeable should be hung out
the window. Under these conditions only, the screen may be removed to indicate a student’s location to the Fire
Department personnel. If a window cannot be opened, or if there are no windows, students are to remain close to
the floor. The best breathing air will be 18 inches above the floor. A window is never to be broken unless it is
absolutely necessary for survival.

It is the Resident Assistant’s responsibility to inform students of these procedures at the first floor meeting and to
answer any related questions. It is not the Residents Assistant’s responsibility to knock on doors and ensure that
everyone is off the floor during a fire alarm. They are instructed to assist the fire department with crowd control
and other duties as assigned. During an emergency, all questions should be directed to a member of the hall staff.

In the event that a student with a disability is not able to follow standard evacuation procedures, he/she should
contact the Residence Hall Coordinator or obtain a Request for Evacuation Assistance Form. Instructions regarding
evacuation procedures will be provided to the residents who complete this form.

Students with temporary disabilities, i.e., broken leg, sprains, recovering from surgeries, whose mobility will be
limited for a period of time, should contact the Residence Hall Coordinator and complete a Request for Evacuation
Assistance Form. Instructions regarding evacuation procedures will be provided to the residents who complete this
form.

All fires reported will be included on the fire log for inclusion in the Annual Fire Safety Report.
**OVERVIEW OF FIRE PROTECTIVE FEATURES IN THE RESIDENCE HALLS**

The University houses students in seven residence halls and five apartment complexes. The following table provides a summary of the fire protection features provided in each of the housing facilities:

** Note these residence halls are vacant and have not been occupied since September 2012.
**FIRE SAFETY STATISTICS BY YEAR**

The data presented in the following table summarizes the reported fires that occurred in housing facilities from January 2009 through December 2012. Statistics as reported to Illinois State University Environmental Health and Safety and are valid at publication; however, they may not reflect current trends. Please note that the housing facilities presented in the following table are only university owned property and part of Illinois State University. Off campus housing including rooming houses, private residence halls, multi-family apartment dwellings, and fraternities and sororities not owned and operated by ISU and, therefore, fire statistics from off campus housing are not included in this report.

**REPORT AT A GLANCE:**

In 2009 there were three (3) actual fires at residence halls resulting in no injuries or deaths and a fire loss of $6,100. The fire alarm was activated four (4) times by unknown persons without cause. The remaining sixteen (16) responses were due to alarms caused by; faulty detector, smells or odors causing the fire department to be called, water or human error.

In 2010 there were three (3) actual fires at residence halls resulting in no injuries or deaths and a fire loss of $23,040. The fire alarm was activated one (1) time by unknown persons without cause. There were six (6) alarms caused by construction related incidents. The remaining twenty-five (25) responses were due to alarms caused by; faulty detectors, smells or odors, water or human error.

In 2011 there was one (1) actual fire at residence halls resulting in no injuries or deaths and a fire loss of $0. The fire alarm was activated four (4) times by unknown persons without cause. There were five (5) alarms caused by construction related incidents. The remaining fourteen (14) responses were due to alarms caused by; faulty detectors, smells or odors causing the fire department to be called, water or human error.

In 2012 there were two (2) actual fires at residence halls resulting in no injuries or deaths and a fire loss of $20,250.52. The fire alarm was activated four (4) times by unknown persons without cause. The remaining eighteen (18) responses were due to alarms caused by; faulty detectors, smells or odors, water or human error. There were two (2) false calls where nothing was found.

**ISU EMERGENCY ALERT**

ISU Emergency alert is an emergency notification system that is designed to contact the campus community in the event a campus emergency. Students are encouraged to register multiple modes of contact for emergency alerts to increase the likelihood of receiving these critical messages in the event of an emergency. The system uses traditional wired phone technology along with cell phone technology including voice or text messages. It also has the capacity for registrants to add an alternate email address. Information will be stored securely and only used for ISU Emergency Alerts and scheduled system tests. Shortly after a message is sent by the ISU Emergency Alert system, it will also be posted to the Illinois State University webpage.

**RESIDENCE HALL FIRE SAFETY ENHANCEMENTS**

- In accordance with state statute, the University completed the residence hall sprinkler retrofit program by the year 2013.
- August 2012 the new Cardinal Court Complex was occupied and it contains state of the art fire and life safety features.
- Fiscal year 2014 Fire system upgrade / replacement of public area fire protection devices at Hewett.
- Fiscal year 2014 Fire system upgrade / replacement of public area fire protection devices at Manchester.
- Fiscal year 2015 Fire system upgrade / replacement of public area fire protection devices at Wilkens.
- Fiscal year 2015 Fire system upgrade / replacement of public area fire protection devices at Haynie.
- Fiscal year 2016 Fire system upgrade / replacement of public area fire protection devices at Wright.

Note: These improvements are tentative and are subject to change without notice to the public.
